

Omegalink is the pinnacle of vehicle integration solutions. We are proud to introduce this new state-of-the-art product line that will further enhance your installation and performance experience with all of Omega's vehicle security and convenience systems. All modules can be installed by connecting wire-to-wire or via the D2D port on any "DP" equipped model.

Solo Series - Exemplify convenience and installation simplicity with this series of fixed application interface modules. They come preloaded with platform specific software which is fully updateable via the OL-LOADER USB programmer.

Multi Series - One module does it all!! This series of modules offers you the ultimate flexibility in vehicle integration. With three distinct product platforms, you can cover the entire spectrum of all available firmware solutions. The **OL-MDB-ALL** is our flagship module. It's a one stop solution that supports ALL available firmwares for all applications.
