Our full line of immobilizer bypass kits offer you all the solutions you need, not just a few. Making your customers give up a key is NOT a solution because of the increased cost and potential unreliability. Our kits prevent that wherever possible. They feature patented technologies, reliable performance, and all Omega remote starts have a plug-in port for our bypass kits.

ANALOG FAVORITES

AU-VAT
GM VATS Override Kit
Socket, relay, and set of 15 precision resistors for adding remote start to vehicles equipped with the G.M. Vehicle Anti Theft System.

PASS-2
"Dial In" GM Passlock II Bypass Kit
This module allows a remote car starter to be installed and correctly operate in vehicles equipped with the GM Passlock II Theft Deterrent System. The bypass is activated only when the remote start module engages to maintain the integrity of OE operations.

PASS-3
Ford PATS Bypass Kit
This module allows the remote car starter to be installed and correctly operate 1996-99 vehicles equipped with the Ford PATS or SecurILock Theft Deterrent System. The bypass is activated only when the remote start module engages. Includes the needed transponder. This module is plug-n-play compatible with all Omega remote start systems.

PASS-4
Universal Transponder Bypass Kit
This module allows remote starting in any transponder-equipped vehicles. A spare key (not included) is placed inside the module and the key's transponder signal is transmitted to the car only during remote start. This module is also plug-n-play compatible with all Omega remote start systems.
