AU-76MP

Psyren™

Layered Multi-Tone Sirens

The distinct sound of these sirens will grab anybody's attention. This patented technology activates an additional tone 3 seconds after sounding the first. These layered and non-sequential tones give the impression that multiple alarms have been activated. The AU-76MP incorporates Psyren™ technology in a compact housing for cramped installations. The AU-77MP features Omega's enhanced 2 in 1 Psyren™ technology.

Painfully Effective Vehicle Theft Deterrence.

AU-70SL

Single/Multi-Tone Siren

Standard six tone, 20 watt siren that has a loop that changes to a single tone when cut.

AU-70SL

AU-74M

Backup Battery Multi-Tone Siren

Six tone, 20 watt siren with selectable, loud or soft chirps. Built-in NiCad battery that keeps the siren sounding even if the wires are cut. Includes 2 keys for enabling/disabling the backup battery circuit.
