

## GM PASSEY III TRANSPONDER BYPASS KIT (NO KEY REQUIRED)

### PROGRAMMING:

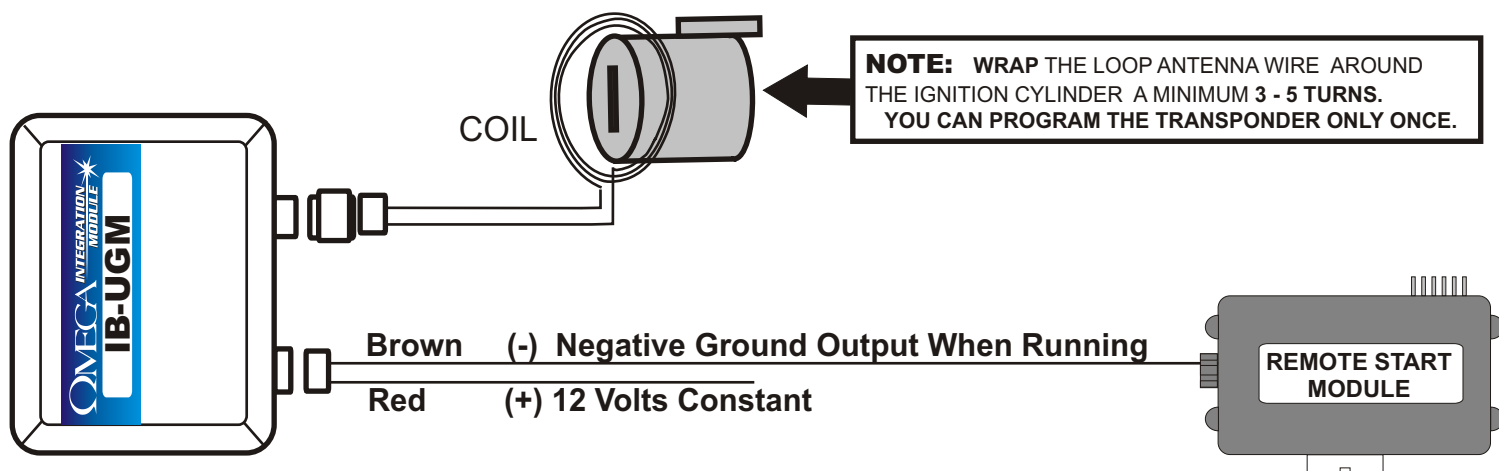

- 1- After the module has been installed correctly (Do not install bypass module on a metal surface):  
-Insert first key and turn to the **IGN "ON"** position: after 1 second turn **"OFF"** and remove the first key.
- 2- Within 10 seconds, insert second key: turn to **IGN "ON"** position: after 1 second turn **"OFF"**.
- 3- For the next 2 steps position & hold the module (screw side) towards the front of the ignition barrel (key cylinder).
- 4- Using a jumper wire, power up vehicle ignition. (Without starting vehicle). The module is now programmed.

### IMPORTANT NOTE:

Once the bypass kit has been programmed to a vehicle, it cannot be used on any other GM vehicle.
