

2000-05 VW IMMOBILIZER BYPASS KIT

***VW SCAN TOOL IS REQUIRED TO PROGRAM THIS MODULE**

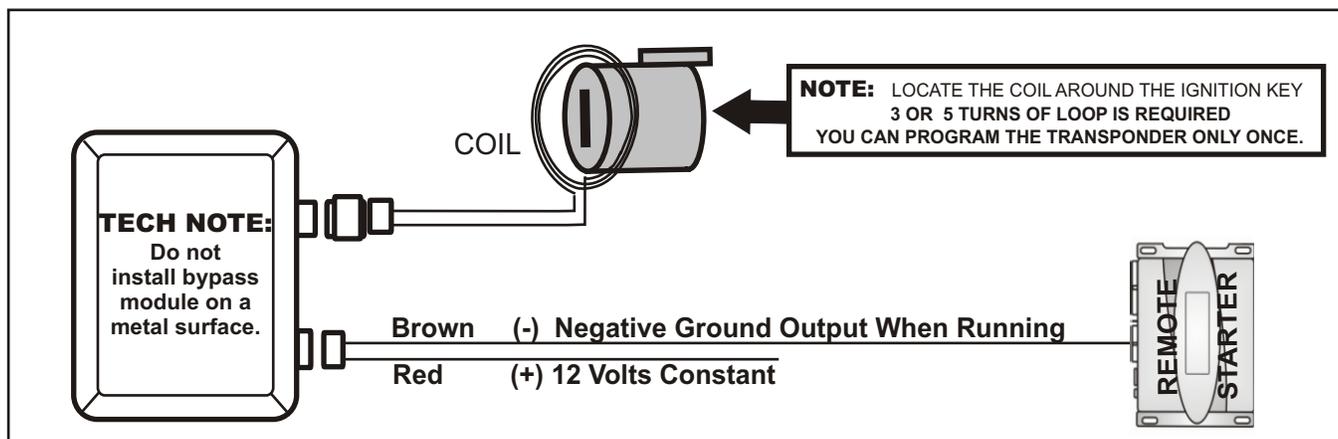

BYPASS MODULE PROGRAMMING MODE

You will need ALL valid keys. Proceed as follows:

- 1- Connect scan tool to vehicle.
- 2- Turn key to ignition "ON" position
- 3- Follow instructions on scan tool
- 4- **POSITION & HOLD THE MODULE (SCREW SIDE) TOWARDS THE FRONT OF THE IGNITION BARREL (KEY CYLINDER) FOR THE **NEXT STEPS.****
Reminder: coil Loop is NOT USED during PK programming)
- 5- Using a jumper wire, power up vehicle ignition, without starting vehicle.
- 6- Remove ignition jumper wire & PKU module from the ignition cylinder.
- 7- **It is important to try all the keys programmed to the vehicle and verify if the security light in the dash comes "ON" when you remove the key from the ignition barrel.**
- 8- Re-connect the module and test the remote starter.
- 9- The module is now programmed successfully.

IMPORTANT NOTE:

Once the module has been programmed to a vehicle, it cannot be used on any other vehicle. (This a feature from the factory.)

TECH NOTE:

- No wiring harnesses should be connected while programming Transponder Bypass.
- Do not install bypass module on a metal surface.

Transponder Bypass: RF override through induction using loop antenna. (transponder incl. no key required). MFG Scan tool required.
